

COVID-19 HOSPITAL ACCESS

Physical access to hospitals is becoming increasingly difficult (especially during shift changes) as the coronavirus spreads. TXP Chat™ can be used across the organization to communicate and track real-time updates for hospital access.

Search for a hospital to get the most current entry/access policies

Avoid costly delays due to heightened security at hospitals

Every member of your team (family care, clinical, hospital development, tissue/eye) can update staff in real-time
